

The image shows a close-up of a large, industrial valve mechanism, likely part of a dam or a large water control structure. The valve is made of heavy metal and features a series of vertical slots or fingers. A red arrow points to a specific part of the valve mechanism, which is labeled "valvola di massima". The valve is mounted on a yellow metal frame. The background shows a concrete structure, possibly a dam wall, and some water. The date "01/03/2010" is visible in the bottom right corner.

valvola di massima
